

RONDA SOAP DISPENSER

SPECIFICATIONS

Touch-free electronic soap dispenser for wall-mounted installations. Activated by infrared sensor. Chrome plated body, other finishes available. Includes a 1-liter soap bottle and bottle support. Can be used with any non-proprietary soap. Powered by a 12V transformer or battery. With a designated peristaltic pump that prevents clogging and back flow. Remote installation option: extension cable and longer piping. The following functions can be performed by remote control: Soap quantity, soap tank refill, temporary off and reset to factory settings.

OPERATION

Touch-free electronic soap dispenser operated by infrared sensor. The soap dispenser automatically activates when users place their hands within the sensor range, providing a measured amount of soap (adjustable by remote control). If the users remove their hands before the full amount is dispensed.

APPLICATION

With the dripless automatic shutoff, RONDA soap dispenser helps Washroom organization and cleanliness. Combined with RONDA touch-free electronic faucet, it creates a germ-free automated environment.
